OS700 Contactless RFID Card Safe

OS700 standard laptop size

The Onity OS700 RFID guestroom safe is designed to efficiently utilize space and securely store laptops, tablets, purses or other valuables. It comes in traditional front opening drawer (right or left hand options), is available in black and may be keyed alike. All models are fully motorized with two solid steel, anti-drill rotating bolts and feature low battery warning, audit trail and mechanical key override.

Contactless RFID technology allows operation to both the guestroom and safe with a simple touch though keycards, wristbands, or key chains making these safes easy to use and functional. Each new guest card overrides previous cards.

Hotel management can use a portable programming unit to override guest safe access when room cards are lost, create new secure credentials and obtain audit trails using the same software as the front desk, eliminating the need for costly software add-ons and for hotel guests to revisit the front desk.

Combined with the proven reliability that Onity solutions are known for, the OS700 series of safes are available in two sizes to meet a variety of hotel guest needs.

Features

- Reading technology: contactless RFID (ISO14443A, 14443B part 4, NFC)
- Supports MIFARE Classic®/EV1, MIFARE Plus®, MIFARE Ultralight® and MIFARE Ultralight C cards
- Rental mode option at check-in
- Compatible with Onity OnPortal™, HT24W, OnPoint® and HT22 stand-alone electronic locking systems
- Mechanical key override

Portable Programmer Unit

- Emergency openings
- Password protected
- Non-resident master code
- Downloads audit trail (last 500 operations)
